***Claim Rejections - 35 USC § 112***

1. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 the phrase "is fastenable...", in claim 2 the phrases "is foldable.." and "is fastenable to itself...", and in claim 3 the phrase "is fastenable releasably.." are functional, indefinite, and incomplete because they contain functional language not supported by recitation in the claim of sufficient structure to warrant the presence of such language. (MPEP 2114) It is not clear what structural limitations applicant intends to encompass with such language.

***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rousseau (4599811).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rousseau in view of Sinclair (4458431) and Boggs (4788780).

Art Unit: 3728

Rousseau shows a boot comprising a toe portion (5), fastening means (6, 7, 8, 12, and 13), and a strap (11) substantially as claimed except for the strap being fastened to itself and providing a strap on the foot portion. Sinclair teaches providing straps which are both fastened to the boot and fastened to itself. Boggs teaches providing two straps, one on the ankle portion (55) and one on the foot portion (53). It would have been obvious to provide two straps as taught by Boggs and to use a multi-fastenable strap as taught by Sinclair in the boot of Rousseau to provide more secure fastening means and to provide greater adjustability.
